Kellyville Landscape Supplies

**The Sandstone  
Specialists**

Kellyville Landscape Supplies

**KLS**, the sandstone specialists, have been in operation for over 30 years. We started small and are now located in purpose built premises with state of the art equipment. We provide the highest quality stone at competitive prices. Our range includes sandstone, both local and imported stone and we have a range of products, colours, cuts and finishes.

Ask us for a quote on sandstone cut to size or see if what you need is in stock. We keep a stock of standard sized wall capping, pier caps and pavers. Our sandstone cladding, ballast and hydrasplit blocks come in various sizes and colours.

You can find us at 735 Windsor Road Box Hill, which is 5 mins from the new Rouse Hill Town Centre and easily accessible from the M2 and M7. We supply the landscaping and building trades as well as the general public. We can deliver to all areas of Sydney and are open 6 days a week.

## The Sandstone Specialists

**KLS** specialise in the supply of natural sandstone products such as ballast, slabs, hydrasplit blocks, logs, pier caps, wall capping and split flagging. We also custom cut and dress sandstone to create a special feature like a pyramid pier cap, chamfered step tread or a commemorative memorial. Our custom cut products can be for use indoors and out, in both building and architectural applications and landscaping.

### We provide the following products and services:

- Sawn sandstone
- Split sandstone such as flagging + both square and random flagging
- Hydrasplit blocks
- Himalayan tiles
- Random cladding
- Random square cladding
- Rock faced cladding
- Imported stone
- Feature rocks
- Sandstone tiles
- Commemorative memorials
- Pier caps
- Sandstone seats
- Logs
- Letterboxes
- Water features
- Concrete pots
- Engraving
- Bull nosed finish
- Rock faced finish
- Pencil round finish
- Custom cutting
- Wall capping

# Projects

**KLS** sandstone is durable and consistent, and makes a bold statement in any construction application, adding value through timeless beauty that only natural stone can offer.

Our stone can be found in a range of projects around Sydney.

- The Mater Hospital external walls were clad with our products, to create a natural finish.
- Architecturally designed homes at Neutral Bay and Woolwich have been constructed using our rock faced blocks.
- Sandstone restoration works have been carried out at the University of Western Sydney at Parramatta.
- Sandstone blocks were used to create a grand entrance at Riverside Oaks Golf Club, Cattai.

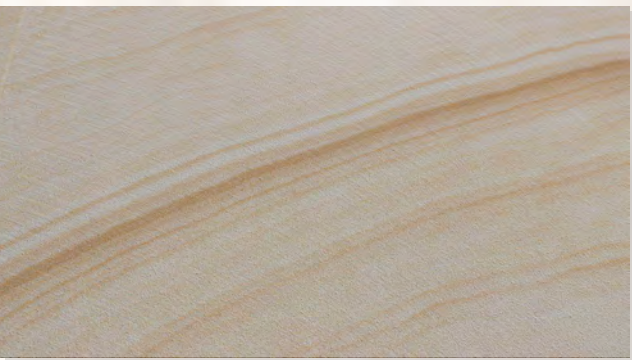

# Finishes and Colour Range

Please note that the KLS colour range is a guide only as colour and grain pattern will vary from piece to piece due to the fact that sandstone is a natural stone.

KLS Medium Banded

KLS Medium Banded

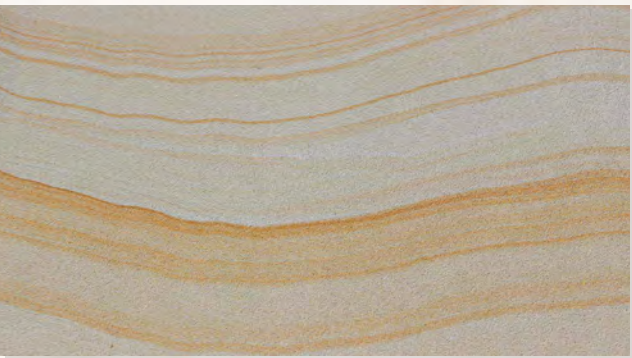

KLS Pink

KLS White

KLS Light Banded

KLS Light Banded

KLS Buff

Mangrove Buff

# Sandstone Cladding

Sandstone cladding is used where the feel of natural stone is needed without the bulk and the weight of solid blocks. Its uses vary from retaining walls to feature walls to fireplace surrounds and water features.

Use standard sizes or we can cut to size. Our sandstone cladding varies from 30mm thick to 50mm thick.

Rock Faced Cladding

Nullarbor Cladding

Aspen

Narooma

# Sandstone Cladding (cont.)

Envirostone Rumbled

Envirostone White

Envirostone Mixed Colour

Random Rockfaced 50mm mixed colour

# Natural Stone Wall Cladding

This range is an alternative to sandstone and is made up of lime stone and quartz. Our range can be used in any application where sandstone is used but is thinner and therefore lighter and often more cost effective.

All of the KLS natural stone cladding range is available in various sizes at approximately 25mm-35mm thickness.

# Travertine

Travertine is in fact a form of limestone that has been affected by extreme heat and pressure to become the textured stone that we use today.

The stone is polished smooth and then can be filled or left natural.

We stock standard 610mmx406mm and 406mmx406mm in both 30mm and 12mm and also available in French pattern.

It is very durable for high traffic areas but as with all natural stone it is porous and will require sealing with a reputable sealant.

Travertine tiles can be used in various applications – paving, wall cladding and interior flooring.

French Pattern Classic

French Pattern Silver

Classic Tumbled Paver

Silver Tumbled Paver

# Quartzite

Quartzite is a natural stone which is harder than sandstone and is ideal for use around pools.

We now stock Pacific Blue Quartzite in various sizes. For cladding walls we have 20mm-30mm thick veneer and the 40mm-55mm thick flagging and 40mm-60mm thick step stones can be used in various landscape applications.

The stone can vary in colour and thickness as it is a natural product.

## Monuments and Architectural Projects

We use state of the art equipment and time honoured hand techniques to create important statement pieces.

Engraving a slab of sandstone to the customers requirements creates a bespoke piece for the business or home. While a solid pedestal of sandstone, displaying a plaque or brass object is symbolic and commemorative.

## Cleaning & Maintenance of Sandstone

### Cleaning & General Maintenance

Unsealed sandstone is prone to picking up dirt, dust, oils, and greases due to its porosity. Hence contaminants will be absorbed, not only causing staining but promoting the growth of algae. Sandstone is generally best cleaned of dust build up using warm water and a mild detergent with a soft brush.

### Sealing

Advantages of sealing sandstone:

- Sealed products are much easier to maintain.
- Sealing reduces the amount of water being absorbed; therefore sealing sandstone significantly reduces mould & algae growth.
- Sealing enables the easier removal of common stains, such as grease, oils, dyes, leaf tannins etc.
- Sealing protects your investment, keeps your sandstone looking good for many years to come.
- By using a professional specialised sealing product you are covered by a warranty.
- If you choose to have a Professional Applicator apply the sealer, the company will warranty it up to 15 years.
- Sealing sandstone is a great way to reduce the risk of water staining or marks.
- Sealing will stop deep penetration of any spills making it much easier to remove marking.

### Commercial Sealers

At Kellyville Landscape Supplies we carry a range of sealers and cleaners. There are different types of sealers:

- Penetrating sealer that penetrates the porous sandstone and leaves a natural finish.
- Consolidating sealer that hardens the sandstone. (Especially suited for pool areas)
- Those that enhance the colour of the sandstone or high light the natural grain.

### Tile Adhesive and Grout

We stock MAPEI products for your convenience. Adhesive is available in white or grey and we stock high performance grout.
